Literature argues that teaching in
the Zone of Proximal
Development where the
child's learning is mediated
and scaffolded by the teacher or
expert adult or knowledgeable
peer makes learning more
meaningful, easier, manageable,
effective and efficient. The major
challenge that the theory presents
to teachers is that it is difficult to
identify every learner's zone
of proximal development ... Fri,

page 2 Ortiz-Barney, Stromberg,
and Beauchamp TIEE Volume 3,
April 2005 ABSTRACT This
lesson is designed to introduce
students to the concepts of
succession and plant community
dynamics. It teaches that plant
communities are dynamic, that is,
they change over time and space,
and that these changes result from
interactions between plants, their
biotic and abiotic environments,
and chance events ... Thu, 10
